PRICE LIST

January, 2021

Prism Photographics prints all images on an Epson 9880 and 11800 using Ultrachrome K3 ink. When capturing your original artwork, or importing your file for proofing, there is an initial setup charge which includes the color correction of your image in the first stage of the proofing process. Additional work, such as fixing blemishes on the image and other custom work will be charged \$82/hour. In the final stage you will be given the option to participate in the final stage of the proofing process before your artwork is reproduced to insure your satisfaction with the final print. All prints are on 100% acid-free substrates with archival inks, and if kept under conservation glass, may be light-fast for over 100 years or more depending on your lighting situation. High UV lighting, especially direct sunlight, will shorten the life.
