## PRICE LIST

January, 2023

Prism Photographics prints all images on an Epson 9880 and 11800 using Ultrachrome K3 inks on acid-free paper. If kept under conservation glass, may be light-fast for over 100 years or more depending on your lighting situation. High UV lighting, especially direct sunlight, will shorten the life.

When capturing your original artwork, or importing your file for proofing, there is an initial setup charge which includes color correction of your image. Additional work, such as fixing blemishes on the image and other custom work will be charged \$95/hr.

### Scanning to file from Epson flatbed and Nikon 9000

Reflective and transparency up to 11x17 – \$13.25 ea.

Prices are for scans only and do not include color corrections or touch-up.

### Canvas Stretching: length + width equals United Inches (UI)

Regular stretch on 5/8" bar, suitable for framing – \$1.20 per UI

**Galley wrap reflected edge setup:** \$8 minimum.

Custom touch-up and wraps may require more time.

**Gallery wrap** with reflected edges on 5/8" or 1 1/2" bar – \$1.70 per UI

**Shrink-wrapping finished prints on foam board** – 28¢ per UI

### Dry Mounting

On clay-back foam board – 45¢ per UI – On acid-free foam board – 55¢ per UI

We take pride and care in reproducing your artwork as accurately as possible. However, there are some colors that cannot be reproduced in the gamut of pigment printing.

Minimum turnaround time is one week for high-resolution scanning and proofing of your artwork. Emergencies, based on our workload may incur rush charges.

### IMPORTANT NOTES ON SUBMITTING DIGITAL FILES

If you have digital files for printing only, please email those to info@prismphotographics.com with instructions on sizes, paper to print on, and your phone number. We will then get back to you if the files have the proper resolution for the sizes requested and that the sizes will proportionally work for the sizes requested and any other questions. Proofs of the cropped photos can be emailed back to you for approval.

If you come in with files on a camera or thumb drive we cannot guarantee that we can stop work in process to go over all your files. All files from a phone camera **must** be emailed anyway, so best to do that from your home or your office first.

As for phone photos, they are all across the board as to whether they will work. In general they're not a substitute for a good camera, but have made them work.

**Photos embedded in a text message will not work at all.**

Samples of all print papers and canvas are available at our studio for your review.

Ask about quantity discounts.

Prices subject to change without notice.

**For payment, local check, cash or Venmo preferred.**

If payment by credit/debit card, any discounts will have 3.25% subtracted.

### DIGITAL CAPTURE

**Betterlight Digital**

**Scan Back**

**Up to 192mb capture**

**Full Setup**

Includes capture, initial color work and approximate 8x10 proof

Minimum set up charge:

Up to 30 x 40 – \$147

for proofing on paper

For proofing on canvas add \$10

Larger pieces are quoted

Sometimes our Epson flatbed scanner will work on pieces up to 11x17 which can save you up to \$45. Art must be perfectly flat to make it work.

Restoration, custom work, Photoshop work, tutorials & graphic design \$95/hour.

### Print substrates and prices on next page

On a side note, we do not use the term **giclée**, which is a French term meaning to *squirt*, as in an inkjet print, which by no means indicates archival quality and was derived in the 1990s because it sounded better than inkjet. It's all about marketing – would you like some *cheese* or *fromage*? We use the term **pigment print** because pigment inks on acid-free papers last longer than dye inks on regular paper.

## PRINT SIZES AND PRICES

Custom sizes are based on square inches. H x W will give you square inches and we will figure a price if in between the sq. in. listed.  
All art prints come with an approximate 1" border. Sizes 8x10 and smaller may be an approximate 1/2" border.
